Vermont," by the writer of the present crticle. The article presats the popuation, the economic and the character status of the rural part of the State, and to this end six diagram maps of Vermont are used showing prominent economics and population changes. The

interpretations of the article are based on statistics of population change, farm products, road mileage, taxation, and church membership and attendance. A great deal is due to the business skill and enterprise of the leading Vermont railroad lines and other commer dal industries in the way of keeping Vermont advertised to the larger world around us. But the State Legislature has been a strong factor in the work investigation and agitation which has created a growing demand for Verment's desirable unoccupied farms Believing that the so-called abandoned farms presented a serious problem, the Legislature of 1888 appointed the Hor A. P. Valentine of Bennington "commis doner of agricultural and manufacturing nterests of the State of Vermont." The object of this commission was to invest tigate these interests and to means to develop the same." A further act was passed 'requiring the listers to neapolis, tells how any young procure certain statistical information or the use of the commission." ppropriation of \$2.000 was made for the ew work.

Mr. Valentine's first work was to sens ets of questions to the listers, or no essors of taxes, for statistical informa-"Young Women: - I had frequent tion touching the status of Vermont headaches of a severe nature, dark agriculture.
